TREADTECH

ALUMINIUM DECK SUBFRAME. A PRODUCT BY UNEX.

The Smart Foundation for Elevated Outdoor Spaces

TreadTech's TreadJack Pedestals provide a practical, efficient solution for elevated outdoor decking and tile installations.

Designed to create perfectly level outdoor surfaces, even over uneven or sloping substrates, TreadJack Pedestals are suitable for tiles, pavers, composite, and timber decking. They offer reliable structural support and flexibility across a wide range of applications, including balconies, rooftop decks, terraces, and patios.

Lightweight yet engineered for strength, these adjustable pedestals are compatible with commonly used waterproofing membranes, promote airflow beneath the finished surface, and allow easy access to services-delivering a clean, modern finish. We recommend verifying with your membrane supplier.

TREADJACK FOR TILED DECKS

Designed for tiled applications (when a TreadFrame aluminium subframe is not required), TreadJack adjustable pedestals with tile cradles provide precise height adjustment and dependable load support.

Available in a range of heights, TreadJack pedestals are used with tile cradles and a selection of compatible accessories to suit varying site conditions. Spacer tabs available to suit tile gaps of 2 mm, 3 mm, 4 mm and 5 mm.

LOOKING FOR OTHER DECK SURFACE OPTIONS?

TreadTech offers tailored solutions for a range of deck types. For tile, timber, or composite decking, TreadJack pedestals can be used in conjunction with the TreadFrame aluminium deck framing system.

When paired with the 65 mm joist cradle (KJD2-CR065), the system delivers a strong, level, and NZ Building Code-compliant foundation for durable outdoor spaces.

TREADJACK DECK PEDESTAL HEIGHT RANGE

Pedestal Size	Product Code	Min. Height (mm)	Max. Height (mm)
X Small	KJD2-033	23	33
Small	KJD2-068	33	68
Medium	KJD2-157	67	157
Large	KJD2-405	154	405
X Large	KJD2-595	325	595
XX Large	KJD2-785	392	785

FEATURES:

- Self-leveling head compensates for falls or uneven surfaces - up to 5% slope correction.
- Supports tiles, pavers, timber or composite decking with ease.
- Raises surfaces off the substrate for airflow, drainage and membrane protection.
- Simple to install with progressive height adjustment and locking rings for a secure fit.
- Fully recyclable components - can be removed and reused for future projects.
- Available New Zealand-wide.

ADJUSTS & SLOPES

Our deck pedestals offer adjustable heights ranging from 23mm to 785mm, providing versatility for various deck elevations. The slope functionality accommodates different terrains, ensuring a level deck surface.

QUALITY MATERIAL

Made from high-grade UV resistant polypropylene, these pedestals are durable, fully recyclable, and environmentally friendly.

TECHNICAL SUPPORT

TreadTech's bespoke design service and technical support streamline your project from conception to completion. We offer tailored solutions and technical support, ensuring a seamless installation and an ideal outcome.

10 YEAR WARRANTY

Our commitment reflects confidence in the durability and reliability of our products. Enjoy peace of mind with a 10-year warranty.
